REMARKS

The figures of births and deaths shown in this statement for week ending the 7th April 1956 relate to 207 towns with an estimated population of 28,141 thousands. The total number of towns is 317 and their population is 41,516 thousands. Thus 65% of the total number of towns representing 68% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 15,730 and 5,884 representing birth and death rates of 29.1 and 10.9 per thousand of population respectively.

(a) States (Part A and C) :—The data here relate to 169 towns with an estimated population of 22,271 thousands. Information about Bombay, and Madhya Pradesh could not be included. The total number of towns is 252 and their population is 33,432 thousands. Thus 67% of the total number of towns representing 67% of the total population is covered. The number of births

and deaths recorded in these towns were 12,955 and 4,984 representing birth rates and death rates of 30.2 and 11.6 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(b) States (Part B) :—The data here relate to 38 towns with an estimated population of 5,870 thousands. The total number of towns is 65 and their population is 8,084 thousands. Thus 58% of the total number of towns representing 73% of the total population is covered. The number of births and deaths recorded in these towns were 2,775 and 900 representing birth and death rates of 24.6 and 8.0 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
